

- |                                 |  |
|---------------------------------|--|
| ___ 1. Charles Newbold          | A. Invented Cotton Gin in 1793   |
| ___ 2. Charles Townsend         | B. Invented a planting machine in 1701                                     |
| ___ 3. Cyrus McCormick          | C. Invented the first crop rotation system in the early 1700's             |
| ___ 4. Early Hunter Gatherers   | D. Discovered genetics and carried out first genetic cross with pea plants |
| ___ 5. Eli Whitney              | E. Invented the steel plow   |
| ___ 6. Farmer in Middle Ages    | F. Patented the mechanical reaper in 1834                                  |
| ___ 7. George Washington Carver | G. Discovered hundreds of uses for the soybean and peanut in early 1900's  |
| ___ 8. Gregor Mendel            | H. Patented the first cast iron plow in 1797                               |
| ___ 9. Jethro Tull              | I. Domesticated corn around 7000 bc  |
| ___ 10. John Deere              | J. Banned DDT in 1972  |
| ___ 11. Joseph Gliddend         | K. Added a moldboard to the back of the plow to turn the soil over         |
| ___ 12. Native Americans        | L. Found patches of wild wheat and began to collect and plant the seeds    |
| ___ 13. Egyptians               | M. Invented barbed wire in 1874  |
| ___ 14. US government           | N. Developed a crude plow for digging                                      |

15. How have crop yields changed from 1776 through the twenty first century? (Be specific)

16. How has the introduction of advanced computer technology changed agriculture since the 1990's?

17. Explain when the two "green revolutions" happened and what brought them about.
