

Lesson Plans for 2/6 through 2/10

BSAA

Monday: Pass out Bacteria packet and bacteria worksheet. Students will read information packet in class & formulate questions for the review of literature search. Bacteria worksheet is homework due at the end of class on Tuesday.

Tuesday: Students will have time to work on bacteria worksheet in class. They will also begin to research the questions they formulated for the review of literature.

Wednesday: Take swabs of various places in the school. Culture the swabs on petri dishes. Set up incubation station for the cultures.

Thursday: Record Observation data on cultures. Write lab report up to the results portion.

Friday: Record Observation of the cultures. Finish lab report. Students will create a graphical representation of their findings. Lab report is due Monday.

Vet Tech

Monday & Tuesday: Begin Anatomy and Physiology unit by working through ppt together as a class. Try to formulate questions to ask during the dissection phase of the unit.

Wednesday & Thursday: Work on anatomy and physiology worksheets. Worksheets are due by the end of class on Thursday.

Friday: Review the material and finish questions for the dissection phase.

Orientation

Monday & Tuesday: Begin Swine unit with PPT and notes. Fill out swine breed chart as the ppt is covered.

Wednesday: Cover processing piglets. Pass out and complete the ear notching worksheet in class. Pass out swine worksheet to be completed as homework.

Thursday: Turn in swine worksheet. Review the questions on the test. These questions should be answered as homework due on Monday.

Friday: Watch the Modern Marvels Pig DVD.

Enviro Science

Monday: Graph energy consumption of the class. Discuss findings and results.

Tuesday: Pass out energy puzzle to be worked on in class. If worksheet is not completed, then it becomes homework due on Wednesday.

Wednesday: Discuss the answers to the study guide in preparation for the test on Friday.

Thursday: Play review game for the energy test.

Friday: Take the energy test.

Horticulture

Monday & Tuesday: Work on the third landscape design assignment. Assignment #3 is due by the end of the hour on Tuesday.

Wednesday: Go to greenhouse and set up benches in preparation for spring planting.

Thursday & Friday: Begin planting vegetable starts in the greenhouse.

Ag Science

Monday: Pass out study guide and work through correct answers together in class.

Tuesday: Play review game for test.

Wednesday: Take nutrition test.

Thursday: Begin Reproduction unit with Male reproductive structures ppt and notes.

Friday: Continue Reproduction unit with Female reproductive structures ppt and notes.

Welding

Monday through Friday: Students will receive assignment cards. They will work at their own pace practicing for the padding assignment.
